

Bridgton Public Works Department Monthly Activity Report for July 2020

We have demo'd everything in Brookside Park, a/k/a "Dam Park". The reconstruction is complete.

We have loamed, seeded, installed the granite and done the plantings. The only thing left is to install two park benches.

For personnel changes – we have welcomed three new employees.

- In June we welcomed Justin Adams who is our new Wastewater Foreman. Justin is also overseeing the Parks and Cemetery departments at this time.
- Administrative Assistant – Diane Kiriaji
- Carpenter/Maintenance – George "Joe" Leighton

We spent quite a bit of time repairing washouts around town that were a result of the very heavy rains we have experienced over the last month and kept after sweeping on Main Street to keep the area looking nice.

Ongoing ... continued oversight of the Lower Main Street project, as well as working with the firm of Woodward & Curran on the Wastewater Project.

Several new culverts have been installed throughout town and six dirt roads have been graded.

We continue to monitor the level of two lakes and make adjustments as needed.
