

Emergency Management Agency (EMA) Monthly Departmental Report

August 2020

This past month I met with fire dept members in ref to the storm we had. In that meeting we discussed the response to the storm and ways to improve our response. I was also able to meet with a rep from county dispatch about the same storm and our interest in formally establishing our Emergency Operations Center (EOC). We have installed most of the equipment from the Homeland Security Grant that was received to establish this EOC and the rep from County Dispatch was given a tour while they were here.

I participated in a meeting with other town emergency managers in Cumberland county to begin the process of developing a County Emergency Operations Plan that towns can use to develop their own plan with finer details specific to their own town for each event being planned for. This project will be a huge help to all towns in keeping current on the requirements for being able to receive grants in the future.
