

## Emergency Management Agency (EMA) Monthly Departmental Report

December 2020

This past month I learned of the approval and authorization to order a Telecommunications Command Center through the KeepMeHealthy grant. This "Command Center" is an idea that was discussed with the police department a few months ago and was something we were going to look at in the future. With the efforts of the economic development department, we were able to get approval through this grant to purchase it.

I have also been meeting with vendors and having discussions with different people on a few ideas for the Emergency Operations Center and turn in an economical budget for 2021/22.

I also prepared for and worked on Christmas day in the Emergency Operations Center for a couple of hours to test some of the setup and to learn what is needed to make things run more efficiently.
