

## Emergency Management Agency (EMA) Monthly Departmental Report

March 2021

The month of March was spent on meetings with County EMA on operation plans, interns, radio programs and programming, grant ideas and storm monitoring. I interviewed an intern for the Town to assist EMA with operation plan development and applied for an MMA grant to assist in paying for the position. I met with electrician in reference to EOC power being connected to the generator and will meet again for further review on what needs to be done to accomplish this.

Looking into the generator issue for the public works director while he is on deployment, issue is an over-crank code keeps appearing and will not start. Generator was installed by DM Electric, but they do not service that size generator and rely on Field Electric for any servicing.

I had phone conversations with area towns in reference to developing a social media campaign to help towns keep in touch with their citizens and will be applying for a grant for this.
