

Emergency Management Agency (EMA) Monthly Departmental Report

January 2024

In January, the Bridgton EMA hosted and attended the G-402 class. We also held an informational meeting at the Community Center, in which we presented information about volunteering for warming/cooling centers and shelters. We gained two volunteers after this meeting.

We went to a school safety meeting to discuss various safety topics and grant opportunities. We submitted a Hazard Mitigation Grant for an engineering study for Grist Mill Road. The engineering study is to look at the watershed during extreme weather events. The study will help engineer the proper methods to handle the water runoff through the ditches and culverts. We submitted paperwork to Cumberland County EMA for damages sustained in back-to-back storms the second week of January.

We also attended the quarterly EMA meeting in Oxford County.

Respectfully submitted,
Todd Perreault
Bridgton EMA
