

TOWN OF BRIDGTON

Public Services Monthly Report January 2024

Happy
New Year
2024

With the new year, winter has arrived! The crew battled over 2-feet of snow this month. Crews worked hard and put in multiple days and nights worth of plowing, road treatment, and necessary snow removal. Crews also took a couple of days to clean and maintain all of our equipment so we will be ready for the next storm! As is true every winter, snow fall dictates the availability for other projects, but our crews were able to complete some necessary work on the Bear Pond Road culvert which has been subject to considerable washouts with our major rain events. They will continue to work on other road washout areas and ditching as they are able in between storms.

The Transfer Station has been working on cleanup inside and outside of the facility. Can change overs have been slowing a bit this month for a total of 32 cans (15 trash, 8 recycling, 6 demo, and 3 metal). The freon items were drained on 01/25 and crews have been disposing of scrap as they go. The crew boxed up all of the TV's and electronics and got them ready for shipment. The Salvation Army has been coming regularly to empty the donation bins. Please be sure to donate whenever possible to keep items that can be recycled and reused out of our Municipal Solid Waste. The Transfer Station Store has been doing well and has gained quite a following on social media!

Our Wastewater Treatment Facility startup on January 2nd, was a success! Some of our pump stations were also turned on and everything that was going to Junior Harmon Field is now flowing to the treatment facility. Work continues on the rest of the pump stations and flow is being directed to the treatment facility as we are able to turn them on.

Applications to hook up to the new system are now available! You can get an application online or from the Town Office. Financial assistance is also available for qualified individuals.

Connect to the
New Wastewater
System!

We are now accepting connection
applications!

Financial Assistance available for qualified
applicants through the Wastewater Connection
Assistance Program!
